

Speedometer for Aprilia RX, SX, Derbi Senda R, SM DRD, Gilera RCR, SMT 2010- gear bike

The speedometer with the article number: PI-866996 can be used with the models DERBI Senda with 17-inch and with models with 18-inch rear wheel. There are a few important things to consider when setting up the speedometer. Please follow the instructions for initial setup carefully. You can never (emphasis on NEVER) change those initial settings from the roll diameter (17" or 18") or miles or km/h again afterwards. Once started wrong – always wrong.

HOW IT WORKS:

First set the ignition to OFF.

Change the speedometer when OFF. If the new speedometer is plugged in for the first time when the ignition is OFF, this message appears on the display:

By briefly pressing the key, you can choose between the following displays:

17 2,7 km/h (Picture 1)

17 2,7 MPH (Picture 2)

18 2,7 km/h (Picture 3)

18 2,7 MPH (Picture 4)

Pic 1

Pic 2

Pic 3

Pic 4

IMPORTANT NOTE

17 stands for 17-inch rear wheel and 18 for 18-inch rear wheel.

After the correct selection, press and hold the button for 10 seconds to save the selection. If the ignition is turned ON, this selection is stored unalterable and permanently.

We´d like to point out again that a subsequent change between 17 and 18 inches as well as km/h and MPH is no longer possible, from this point on.
